

Door Shut
Lever. Moves
against middle
micro switch.

Key turned in lock lever - this actuates
one microswitch via a small cam in top
cover of the lock.

Driver's
Side
Door
Lock

Door Latch.

Micro switches normally HERE. I removed
them to replace.

The super - lock lever. Second motor rotates this a
few degrees to allow lock to move to second stage.
See next photo with gear wheel removed.
